

This first section (dotted pages) contains patterns for the three collar-angle muslin tests I draped for the pictures on page 104. I then used a neckline sub-block to transfer my neckline to the collar muslins. These scaled versions can be used to do the same thing on your form or self. You could also simply draw a neckline, or trace it from a paper collar as shown on pages 56-57. The patterns in the following section (no dots) reflect the same shape as in #2 in the first section, drafted out on a specific scaled neckline, for use as described in the pattern sheets for pages 100-101. The patterns in the final section (dotted again) reflect the same under-collar shape as used on three different scaled neckline angles, and shown as muslin on pages 106-107. Use these also as described in the pattern sheets for pages 100-101.
